

SPECIALIZED TESTING PROTOCOLS

Faulty test data can trigger client claims.

You test aerospace hardware and build prototypes. Research-service errors, damaged laboratory instruments and hazardous-material releases involve different interests and accepted terms.

RISKS WORTH DISCUSSING

- 01 Errors in test data
- 02 Laboratory test equipment failure
- 03 Hazardous material fire incidents

Coverage worth discussing

Professional liability

Eligible claims from accepted research or testing services.

Equipment breakdown

Covered internal failures of accepted test machinery.

Workers compensation

Covers lab technician injuries during tests.

Commercial property

Restores lab instruments after covered damage.

Environmental liability

Covered cleanup involving declared chemical releases.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
