

ENGINE COMPONENT PRODUCTION

A small defect can cause a serious engine failure.

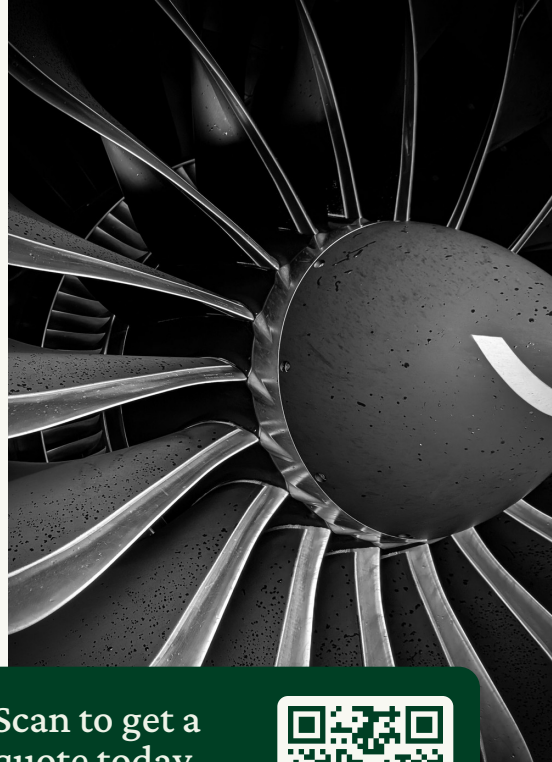

You machine components and assemble aircraft engines where a test-cell fire or a post-flight defect could impact your operations.

RISKS WORTH DISCUSSING

- 01 Uncontained engine failure
- 02 Test cell fire and explosion
- 03 High-value inventory loss

Coverage worth discussing

Products liability

Engine claims under accepted aviation-products terms.

Commercial property

Helps repair plant assets after covered physical damage.

Equipment breakdown

Covers internal failures of test-cell or CNC equipment.

Environmental liability

Cleanup for covered plant pollutant releases.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
