

RAMP CREWS, AIRCRAFT AND MOBILE GEAR

A ramp collision can damage a plane.

You handle baggage, loads and ground equipment beside aircraft. Declare airside duties, passenger work and entrusted property; ordinary business forms do not establish aviation or aircraft-custody protection.

RISKS WORTH DISCUSSING

- 01 Aircraft damage during ramp work
- 02 Ramp employee equipment injuries
- 03 Accepted fuel/de-icing releases

Coverage worth discussing

General liability

Injury/damage under expressly accepted airside terms.

Inland marine

Specified mobile gear under accepted equipment terms.

Equipment breakdown

Covered internal failures of accepted ramp machinery.

Workers compensation

Work-injury benefits for eligible ramp employees.

Environmental liability

Cleanup under accepted fuel/de-icing-release terms.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
