

REDUCTION PLANT OPERATIONS

A power loss can freeze an active potline.

You convert alumina to molten aluminum via electrolytic reduction, where power loss can cause a catastrophic potline freeze.

RISKS WORTH DISCUSSING

- 01 Molten metal steam explosion
- 02 Potline freeze from power loss
- 03 Fluoride emissions liability

Coverage worth discussing

Commercial property

Potlines and casting gear against covered fire loss.

Equipment breakdown

Covered internal potline equipment failures.

Environmental liability

Cleanup for covered smelter pollutant releases.

Workers compensation

Provides benefits for burns and exposure to hot metal.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
