

FEED MILLING AND INGREDIENT MIXING

Feed dust can ignite inside the mill.

You mill and mix feed ingredients. Dust, contaminated batches and failed production machinery can affect animal health, plant property and employee safety.

RISKS WORTH DISCUSSING

- 01 Feed contamination and recalls
- 02 Critical feed line machinery failure
- 03 Plant employee dust inhalation

Coverage worth discussing

Products liability

Covered resulting animal harm from supplied feed.

Equipment breakdown

Covered internal failures of accepted mills or extruders.

Workers compensation

Work-injury benefits for eligible feed-production employees.

Commercial property

Insured mills and declared stock after covered damage.

General liability

Covered visitor injury claims from accepted plant operations.

Commercial auto

Covered road liability for declared feed-delivery vehicles.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
