

AVOCADO GROVE OPERATIONS

Frost, heat, and water stress

Irrigation failure or extreme weather can threaten mature avocado trees. Tree and growing-crop interests need their own terms alongside pumps and buildings.

RISKS WORTH DISCUSSING

- 01 Frost, heat, and water stress
- 02 Wildfire across the grove
- 03 Irrigation interruption

Coverage worth discussing

Commercial property

Addresses insured physical damage to pumps and structures.

Equipment breakdown

Supports repairs after insured internal pump mechanical failures.

General liability

Addresses third-party injury claims involving farm visitors.

Workers compensation

Provides benefits for eligible harvest or labor injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
