

COLOR, CHEMICALS AND HEAT STYLING

A color treatment can cause burns.

You cut, color and style hair using chemicals and heated tools. Actual treatments and practitioners need explicit acceptance, with service injury distinguished from retail-product harm and ordinary salon-premises claims.

RISKS WORTH DISCUSSING

- 01 Chemical burns during hair treatments
- 02 Burns from heated styling tools
- 03 Resulting harm from retail products

Coverage worth discussing

Professional liability

Accepted treatment liability for declared salon services.

General liability

Covered customer injury from accepted salon-premises activities.

Products liability

Covered resulting harm from accepted retail products.

Commercial property

Insured styling stations and stocks after covered damage.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
