

ORGANIC POWER GENERATION

A fuel pile can ignite without warning.

You generate power from organic fuel, processing material before it reaches the boiler. Self-heating stores and pressure failures can damage the operation.

RISKS WORTH DISCUSSING

- 01 Fuel-pile self-heating fire
- 02 Combustible dust explosion hazard
- 03 Boiler and steam-system breakdown

Coverage worth discussing

Commercial property

Insured fuel stores after covered physical damage.

Environmental liability

Covered claims from accepted ash or wastewater releases.

General liability

Covered third-party harm from accepted plant operations.

Equipment breakdown

Covered internal failures of accepted pressure machinery.

Workers compensation

Work-injury benefits for eligible fuel-handling employees.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
