The Southern Agency
Insurance & Bonds

HEATED BITUMEN PROCESSING

Heated product can ignite or burn workers.

Your bitumen plant processes heavy residue, keeping material molten in tanks and heated lines. A breakdown of a heater or pump causes burn risks.

RISKS WORTH DISCUSSING

01 Fire and explosion from heating
02 Severe burns from hot bitumen
03 Tank and process equipment failure

BITUMEN PLANT INSURANCE

Coverage worth discussing

Commercial property
Insured heated-product plant after covered physical loss.

Environmental liability
Covered cleanup from accepted bitumen releases.

Equipment breakdown
Covered internal failures of accepted transfer pumps.

Products liability
Covered resulting harm from supplied bitumen.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
