

BLAST WORK, RIGS AND EXPLOSIVE LOADS

Blasts can crack nearby walls.

You plan blasts, move explosive materials and operate specialized rigs. Blasting and vibration liabilities, actual explosives hauling and cargo acceptance need express terms for the work and materials involved.

RISKS WORTH DISCUSSING

- 01 Blast vibration or flyrock damage
- 02 Explosives transport road collisions
- 03 Damage to insured explosive loads

Coverage worth discussing

General liability

Liability under expressly accepted blasting and vibration terms.

Commercial auto

Covered road liability for accepted explosives hauling.

Motor truck cargo

Covered physical damage to expressly insured explosive cargo.

Inland marine

Insured blasting rigs under accepted equipment terms.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
