

BRIDGE CONSTRUCTION

The next girder is a critical lift.

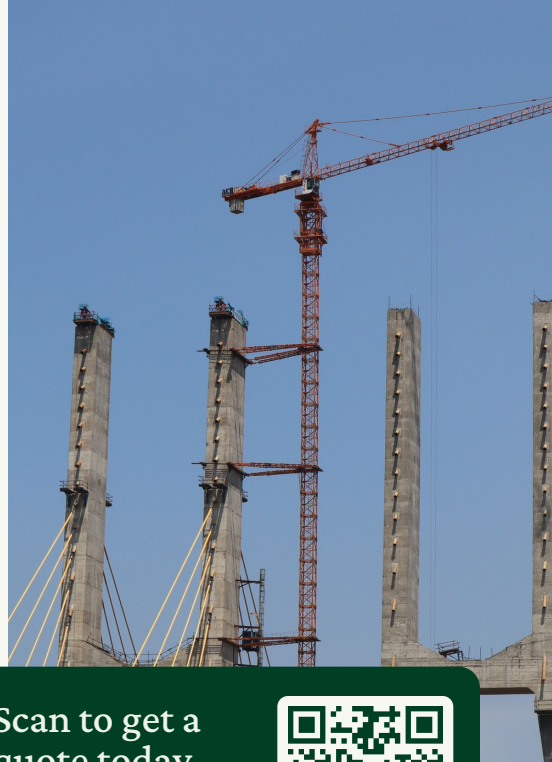

Bridge erection brings heavy members, temporary supports and crews above roads or channels. We review the lifting sequence, engineering services and equipment used on each project.

RISKS WORTH DISCUSSING

- 01 Crane and heavy-lift failure
- 02 Falsework or shoring collapse
- 03 Erection-calculation allegations

Coverage worth discussing

General liability

Covered injury or damage claims from work above public traffic.

Builders risk

Covered physical loss to insured piers, girders and temporary work.

Professional liability

Covered allegations of errors in accepted erection calculations.

Workers compensation

Benefits for covered crew falls and struck-by injuries.

Inland marine

Insured cranes, pile drivers and rigging in accepted operations.

Surety bonds

Bid, performance and payment bonds for contract obligations.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
