

HIGH-VOLTAGE TRANSMISSION

Line contact can ignite a wildfire.

Your transmission network moves high-voltage power over long distances using transformers and lines exposed to fire, lightning, and vandalism, potentially causing service disruptions.

RISKS WORTH DISCUSSING

- 01 Wildfire ignition from lines
- 02 Transformer and substation electrical failure
- 03 Arc flash and electrocution

Coverage worth discussing

Commercial property

Insured tower or substation interests after covered damage.

Environmental liability

Covered cleanup involving accepted insulating-fluid releases.

Equipment breakdown

Covered internal failures of accepted transformers.

Umbrella liability

Extra limits above expressly covered utility liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
