

CANE CRUSHING AND HARVEST CAMPAIGNS

Boiler failure can halt harvest.

You crush cane and run high-pressure boilers during harvest. Machinery repairs, dust-fire damage and lost campaign output need distinct accepted terms.

RISKS WORTH DISCUSSING

- 01 Boiler or steam turbine breakdown
- 02 Sugar or bagasse dust explosion
- 03 Lost harvest campaign output

Coverage worth discussing

Equipment breakdown

Covered internal failures of accepted boilers or turbines.

Commercial property

Insured mill assets after covered physical damage.

Environmental liability

Covered cleanup under accepted process-water release terms.

Products liability

Covered resulting harm from supplied sugar products.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
