

HIGH-SPEED FIBER PROCESSING

Continuous processes face shutdown risks

You process fiber into board where high-speed drying lines run continuously and combustible paper presents fire hazards.

RISKS WORTH DISCUSSING

- 01 Combustible stock fire loads
- 02 Machinery breakdown production stops
- 03 Worker injuries on high-speed lines

Coverage worth discussing

Commercial property

May protect your factory and combustible stock.

Equipment breakdown

May help with internal failures of rollers or dryers.

Products liability

May address claims if board causes property damage.

General liability

May help with third-party injury during operations.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
