

STRUCTURAL CARPENTRY

Open framing leaves crews working at height.

Framing exposes crews to falls while work remains open to weather. Review the build separately from your saws and vehicles.

RISKS WORTH DISCUSSING

- 01 Falls from height
- 02 Structural workmanship claims
- 03 Damage to work in progress

Coverage worth discussing

General liability

Helps with claims for third-party injuries or damage from your framing work.

Builders risk

Covers physical loss or damage to project materials during construction.

Commercial auto

Covers vehicles used to transport lumber and framing equipment.

Workers compensation

Provides medical and wage benefits for employees after fall or tool injuries.

Inland marine

Covers theft of or damage to saws and compressors at job sites.

Umbrella liability

Provides higher liability limits above your primary insurance policies.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
