

TUFTING & FINISHING LINE

Synthetic yarn creates dense fire loads

You finish yarn into carpets where large ovens and backing lines create fire potential and stringent flammability standards.

RISKS WORTH DISCUSSING

- 01 Heavy fire load from yarn rolls
- 02 Flammability performance failures
- 03 Tufting and backing line breakdown

Coverage worth discussing

Products liability

May address injury claims related to your product.

Commercial property

May protect your plant and backing machinery.

Equipment breakdown

May help with internal failures of backing lines.

General liability

May help with third-party injury at your plant.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
