

CEILING INSTALLATION

Ceiling grids go in above occupied spaces.

Overhead work places lifts, loose tiles and fastening tools above finished rooms. Account for falls and damage to sprinkler lines as well as the materials and equipment you bring to the site.

RISKS WORTH DISCUSSING

- 01 Falls from lifts and scaffolds
- 02 Falling tools and materials
- 03 Damage to building systems

Coverage worth discussing

General liability

Responds to claims for injuries or damage caused by falling materials.

Inland marine

Covers theft of or damage to fastening tools and lifts at sites.

Umbrella liability

Provides higher liability limits above primary policies.

Workers compensation

Provides medical and wage benefits for employees working overhead.

Commercial auto

Covers vehicles used to haul grid and tile to commercial sites.

Business owners policy

Property and liability protection for an eligible ceiling contractor's shop.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
