

GRINDING & KILN PROCESSING

Grinding mills face heat and dust hazards.

You grind clinker into cement. Review mills, dust exposure and bulk handling, along with any kiln operations at your site.

RISKS WORTH DISCUSSING

- 01 Rotary kiln breakdown
- 02 Continuous-process interruption
- 03 Dust and air emission hazards

Coverage worth discussing

Commercial property

May protect your kilns and stored cement powder.

Environmental liability

Liability for covered dust or emission releases.

Equipment breakdown

May help with internal failures of grinding gear.

Workers compensation

Benefits for kiln or grinding crew injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
