

SHARED HOSTS AND CUSTOMER WORKLOADS

A change can disrupt tenants.

You host customer applications on shared compute, storage and networks. Accepted hosting duties and grouped claims matter; hardware repair, data response and service credits are different interests.

RISKS WORTH DISCUSSING

- 01 Shared hosting configuration errors
- 02 Cross-tenant account access
- 03 Internal server equipment failures

Coverage worth discussing

Professional liability

Covered claims involving accepted hosting services.

Cyber liability

Covered platform–data response and security liability.

Equipment breakdown

Covered internal failures of accepted physical systems.

Commercial property

Insured owned hardware after covered physical damage.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
