

DEVICE CUSTODY, REPAIRS AND DATA RECOVERY

A repair can erase irreplaceable files.

You replace components and may recover data from client devices. Accepted repair duties, physical device custody and data-restoration interests need distinct terms, with privacy incidents separate from a failed recovery.

RISKS WORTH DISCUSSING

- 01 Allegedly negligent data-recovery work
- 02 Damage to devices held in custody
- 03 Client-data breaches or battery fires

Coverage worth discussing

Business owners policy

Eligible shop property and premises liability together.

Inland marine

Insured client devices under accepted custody terms.

Cyber liability

Covered client-data breach response and privacy claims.

Professional liability

Covered claims over expressly accepted repair/recovery duties.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
