

ARCHITECTURE, INTEGRATION AND CUTOVER

A bad cutover can stop client work.

You select and integrate hardware, networks and software for clients. Define design, vendor advice and cutover duties; client financial claims, data events and staged-equipment damage need distinct terms.

RISKS WORTH DISCUSSING

- 01 Architecture or integration design errors
- 02 Client-data incidents during migration
- 03 Physical loss of staged project equipment

Coverage worth discussing

Professional liability

Covered claims involving accepted design/integration work.

Inland marine

Insured staging equipment under accepted transit terms.

Cyber liability

Covered data/security response for declared project duties.

General liability

Covered injury from accepted client-site activities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
