

CONCRETE FOUNDATIONS

Soil movement can become a structural claim.

Foundation pours place crews below grade. Consider trench injuries and resulting property damage alongside the tools you own.

RISKS WORTH DISCUSSING

- 01 Settling and cracking claims
- 02 Excavation and trench collapse
- 03 Water intrusion from foundation defects

Coverage worth discussing

General liability

Covered damage from foundation work or finished operations.

Commercial auto

May cover trucks and trailers used to move materials to muddy sites.

Builders risk

May help with physical loss to project property during the build.

Workers compensation

Benefits for covered excavation and pour injuries.

Inland marine

May protect tools like compactors, rebar tools, and laser levels.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
