

CONCRETE PUMPING

A pressurized line crosses the jobsite.

Outriggers and overhead lines shape every pump setup. The insurance discussion should follow the truck onto the road and address the boom, pump machinery and crew during concrete placement.

RISKS WORTH DISCUSSING

- 01 Boom contact with power lines
- 02 Pump truck tip-over
- 03 Line burst and hose whip

Coverage worth discussing

Commercial auto

May address liability or damage for pump trucks based on their registration.

Workers compensation

May provide benefits for employees injured during setup or pressure work.

Equipment breakdown

Covered internal failures of accepted mobile pump machinery.

General liability

Covered third-party injury or damage from pumping.

Inland marine

May help with damage to pump machinery, booms, and accessories.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
