

CONCRETE REPAIR

Grinding can affect occupied spaces.

Patching and sealing place grinders and chemicals near customer property. Review your repair methods and spill controls, with attention to public access and the equipment you take from one job to the next.

RISKS WORTH DISCUSSING

- 01 Repair failure and callbacks
- 02 Chemical handling and fumes
- 03 Public injury on occupied sites

Coverage worth discussing

General liability

May help with injury or property damage when work affects occupied areas.

Inland marine

May help protect grinders, sprayers, and mixers used across jobs.

Environmental liability

May respond to claims tied to epoxy, solvent, or sealer spills.

Workers compensation

May provide benefits for employees injured during grinding or chemical work.

Commercial auto

May cover trucks used to transport crews and chemical materials.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
