

CONDUIT CONSTRUCTION

Conduit trenches can cross live utility lines.

Trenching and boring put crews beside buried services and road traffic. Review utility-strike liability and excavation duties together with your boring rigs and the conduit under construction.

RISKS WORTH DISCUSSING

- 01 Underground utility strikes
- 02 Trench cave-in and excavation hazards
- 03 Roadway and traffic exposure

Coverage worth discussing

General liability

May help respond to third-party injury or property damage from utility strikes.

Inland marine

May help protect boring rigs and trenchers that move between sites.

Builders risk

May address covered physical loss to conduit during the construction period.

Workers compensation

May provide employee benefits after cave-in or boring injuries.

Commercial auto

May cover trucks used to haul boring rigs and conduit.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
