

HEAVY EQUIPMENT FABRICATION

Design flaws in controls can lead to jobsite injury.

You fabricate and test heavy machinery where equipment failures or operator control issues create high-severity liability.

RISKS WORTH DISCUSSING

- 01 Heavy-equipment product injuries
- 02 Control, guarding and warning faults
- 03 Welding and fabrication hazards

Coverage worth discussing

Products liability

Responds to injury claims from machinery you produced.

Equipment breakdown

Covers internal failures of test rigs and machines.

Commercial property

Protects your plant and steel stock from fire damage.

Umbrella liability

Higher limits above covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
