

AUTOMATED DEVICE ASSEMBLY

Lithium cells create thermal-runaway fire risks.

You manufacture high volumes of connected battery-operated devices using automated assembly and test equipment.

RISKS WORTH DISCUSSING

- 01 Mass-market product defects
- 02 Lithium battery fire and overheating
- 03 Automated line breakdown

Coverage worth discussing

Products liability

Covered third-party harm from manufactured devices.

Equipment breakdown

Covered internal failures of automated assembly gear.

Cyber liability

Responds to security claims involving user data flow.

Workers compensation

Provides benefits for staff assembly-line injuries.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
