

EDGE HARDWARE, CACHES AND ROUTING

A routing error can affect many sites.

Your edge locations cache and route customer content. Accepted routing duties and grouped claims matter; distributed hardware, traffic records and peering outages involve different loss triggers.

RISKS WORTH DISCUSSING

- 01 Shared cache or routing configuration errors
- 02 Security incidents involving traffic records
- 03 Internal failures of edge power/cooling

Coverage worth discussing

Professional liability

Covered claims from accepted delivery/routing services.

Commercial property

Insured owned edge hardware at accepted locations.

Cyber liability

Covered network–incident response and privacy liability.

Equipment breakdown

Covered internal failures of accepted power/cooling gear.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
