

HIGH-SPEED MANUFACTURING LINES

Tunnel ovens can spread a fire.

You bake cookies or crackers on high-speed lines. Flour dust, shared allergens and private-label runs can connect fire and product exposures across several buyers.

RISKS WORTH DISCUSSING

- 01 Tunnel oven fire exposure
- 02 Allergen cross-contact incidents
- 03 Broad product recall exposure

Coverage worth discussing

Products liability

Covered resulting harm from supplied cookies or crackers.

Equipment breakdown

Covered internal failures of accepted ovens or packaging gear.

Commercial property

Insured production lines after covered physical damage.

Umbrella liability

Extra limits above expressly covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
