

CRUDE-OIL PIPELINE TRANSPORT

A ruptured line can release crude oil.

Your pipeline network transports crude across vast distances, with assets buried or exposed in varied terrain where ruptures create major cleanup obligations.

RISKS WORTH DISCUSSING

- 01 Line rupture from ground movement
- 02 Third-party excavation and pipeline strikes
- 03 Pump station fire and breakdown

Coverage worth discussing

Environmental liability

Covered cleanup along accepted routes and release conditions.

Commercial property

Insured pumping stations and declared surface assets.

Equipment breakdown

Covered internal failures of scheduled pumping equipment.

Cyber liability

Covered response to defined control-network incidents.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
