

## CLIENT CODE, REPOSITORIES AND RELEASES

# A code defect can disrupt a client.

You build client applications and integrations, often using licensed components. Accepted programming duties, code rights and access need review; rework, unpaid fees and employment claims differ.

## RISKS WORTH DISCUSSING

- 01 Client losses from production bugs
- 02 Exposure of client code or credentials
- 03 Developer employment claims

# Coverage worth discussing

## Professional liability

Covered claims involving accepted programming services.

## General liability

Covered nonprofessional office/client-site injury.

## Cyber liability

Covered response involving included code/access records.

## Employment practices

Covered employment claims against your insured business.

Coverage is subject to policy terms and exclusions.

## Why The Southern Agency

### 01 Listen

We review your operations, coverage and past claims.

### 02 Assess

We look at hazards and ways to reduce risk.

### 03 Build

We compare carriers, premiums and audit terms.

### 04 Support

We revisit coverage as your work changes.
