CONCRETE CUTTING AND DRILLING

Dust and slurry spread beyond the cut.

Saws work near hidden utilities. Discuss debris and contamination claims alongside the valuable equipment you move between sites.

RISKS WORTH DISCUSSING

01 **Flying debris and blade injuries**

02 **Striking embedded utilities**

03 **Respirable silica dust**

CUTTING CONTRACTOR INSURANCE

Coverage worth discussing

General liability
May help with covered claims if debris or a misplaced cut causes damage.

Inland marine
May help replace saws, core rigs, and blades after insured theft or damage.

Umbrella liability
Adds limits above the underlying liability policies for covered claims.

Workers compensation
Benefits for covered injuries or occupational disease.

Environmental liability
May help with covered slurry cleanup and third-party contamination claims.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
