

DAM AND LOCK CONSTRUCTION

Heavy gate lifts take place beside water.

Cofferdams and gate installation create different exposures within the same project. Discuss each construction phase and who insures the works, including employee duties near water and the cranes you use.

RISKS WORTH DISCUSSING

- 01 Cofferdam or diversion failure
- 02 Heavy equipment near water
- 03 Worker drowning and confined spaces

Coverage worth discussing

General liability

May help with covered claims involving dam and lock construction work.

Workers compensation

May provide benefits for crew injuries around water or heavy machinery.

Inland marine

Insured cranes and pumps against covered loss.

Builders risk

Covered loss to insured dam and lock works during construction.

Environmental liability

May help with covered cleanup from sediment or fuel contaminant releases.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
