

POWER, COOLING AND CUSTOMER HARDWARE

A cooling fault can damage servers.

You operate power, cooling and computing infrastructure. Owned systems, tenant hardware and actual data access need distinct terms; equipment repair does not establish protection for every tenant outage.

RISKS WORTH DISCUSSING

- 01 Internal failures of power or cooling
- 02 Fire damage to insured facility equipment
- 03 Security incidents involving operator systems

Coverage worth discussing

Commercial property

Insured owned facility systems after covered damage.

Cyber liability

Covered incidents under accepted operator-system terms.

Equipment breakdown

Covered internal failures of accepted electrical systems.

General liability

Covered visitor injury from accepted facility activities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
