

FUEL BLENDING AND TRANSFER

Transfer vapors can ignite in a flash.

You receive base fuels and additives, then blend and transfer them through tanks and loading racks, creating vapor and contamination exposure risks.

RISKS WORTH DISCUSSING

- 01 Flammable vapor fire and flash
- 02 Off-specification blend liability claims
- 03 Tank overfill and product spills

Coverage worth discussing

Commercial property

Insured blending structures after covered fire damage.

Environmental liability

Covered cleanup from accepted blending-site releases.

Products liability

Covered resulting harm from supplied blended fuel.

Equipment breakdown

Covered internal failures of accepted transfer equipment.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
