

POWER GENERATION FACILITIES

A turbine breakdown can interrupt generation.

You generate electricity using turbines, engines, or solar arrays and manage grid synchronization and plant maintenance to keep output steady.

RISKS WORTH DISCUSSING

- 01 Generator and transformer breakdown
- 02 Grid interconnection fault events
- 03 High-voltage arc flash injuries

Coverage worth discussing

Commercial property

Insured generating assets after covered physical damage.

General liability

Covered third-party harm from accepted generating operations.

Cyber liability

Covered response to defined plant-network incidents.

Equipment breakdown

Covered internal failures of accepted turbines or generators.

Workers compensation

Work-injury benefits for eligible generating-station employees.

Umbrella liability

Extra limits above expressly covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
