

WELL INJECTION OPERATIONS

Injected fluids can migrate beyond the well.

You use injection methods to recover oil, operating well networks, compressors, and separation facilities to maintain steady production flow.

RISKS WORTH DISCUSSING

- 01 **Injectant migration and groundwater contamination**
- 02 **Injection well or casing failure**
- 03 **Worker injury around pressurized systems**

Coverage worth discussing

Environmental liability

Covered claims from accepted injectant releases.

Equipment breakdown

Covered internal failures of accepted injection machinery.

Workers compensation

Work-injury benefits for eligible injection crews.

Commercial property

Insured surface equipment after covered physical damage.

General liability

Covered third-party harm from accepted injection duties.

Umbrella liability

Extra limits above expressly covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
