

DENATURED ETHANOL TRANSPORT

A cracked line can release ethanol.

You transport denatured ethanol through pipelines, managing pump stations and leak detection across varied terrain to deliver fuel supplies.

RISKS WORTH DISCUSSING

- 01 Stress-corrosion cracking and seam failure
- 02 Third-party excavation strikes on line
- 03 Soil and groundwater contamination

Coverage worth discussing

Environmental liability

Covered cleanup from accepted ethanol releases.

General liability

Covered third-party harm from accepted pipeline duties.

Umbrella liability

Extra limits above expressly covered underlying liabilities.

Commercial property

Insured stations and expressly accepted pipeline assets.

Equipment breakdown

Covered internal failures of accepted pumping equipment.

Workers compensation

Work-injury benefits for eligible pipeline employees.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
