

EDIBLE OIL REFINING AND PROCESSING

Heated oil can escape and ignite.

You refine edible fats or oils using heat, steam and vacuum equipment. Hot leaks, machinery faults and off-spec output affect different plant, pollution and product interests.

RISKS WORTH DISCUSSING

- 01 Heated oil leaks and fire
- 02 Oil releases needing cleanup
- 03 Deodorizer or pump breakdown

Coverage worth discussing

Commercial property

Insured refinery assets and stock after covered damage.

Environmental liability

Covered cleanup under accepted oil-release terms.

Workers compensation

Work-injury benefits for eligible refinery employees.

Equipment breakdown

Repairs boilers after a covered internal failure.

Products liability

Covered resulting harm from supplied refined oils.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
