

FIRE HYDRANT INSTALLATION

A main break can flood nearby property.

Tapping a pressurized main puts excavation beside public water service. Review flooding and trench work together.

RISKS WORTH DISCUSSING

- 01 Struck buried utilities during excavation
- 02 Water main breaks and flooding
- 03 Trench collapse and worker injury

Coverage worth discussing

General liability

Address third-party injuries and flooding damage.

Workers compensation

Provide benefits for injured site crew members.

Surety bonds

Meet specific bid or contract requirements.

Inland marine

Help protect your tapping and excavation tools.

Commercial auto

Help with liability for your work vehicles.

Umbrella liability

Add secondary liability limits for larger claims.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
