GRAIN GRINDING AND MILLING OPERATIONS

Suspended grain dust can explode.

You grind grain using rollers, sifters and conveying systems. Dust ignition, silo conditions and failed drives can affect the mill, finished flour and delivery operations.

RISKS WORTH DISCUSSING

01 **Suspended grain dust explosion**

02 **Silo heating or stock spoilage**

03 **Roller mill or conveyor failure**

FLOUR MILLING PLANT INSURANCE

Coverage worth discussing

Commercial property
Insured mills and silos after covered physical damage.

Products liability
Covered resulting harm from supplied flour products.

Workers compensation
Work-injury benefits for eligible milling employees.

Equipment breakdown
Repairs motors after a covered internal breakdown.

Commercial auto
Covered road liability for declared grain or flour vehicles.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
