

PASTEURIZATION AND COLD-CHAIN DELIVERY

Failed pasteurization can affect a milk run.

You pasteurize and fill milk while maintaining a cold chain. Process faults, machinery repair and chilled-stock values need distinct accepted terms through plant and delivery stages.

RISKS WORTH DISCUSSING

- 01 Pathogen contamination in milk
- 02 Refrigeration or cold-chain failure
- 03 Pasteurizer or separator breakdown

Coverage worth discussing

Commercial property

Insured filling assets and declared stock after covered damage.

Products liability

Covered resulting harm from supplied fluid milk.

Environmental liability

Covered cleanup under accepted dairy-wastewater terms.

Equipment breakdown

Repairs pasteurizers after a covered internal failure.

Commercial auto

Covered road liability for declared milk-tanker routes.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
