Insurance & Bonds

FUEL-FIRED GENERATION OPERATIONS

A boiler failure can halt generation.

You generate electricity with coal, gas or oil using the machinery and emissions systems suited to your specific plant configuration.

RISKS WORTH DISCUSSING

01 **Boiler and turbine breakdown**

02 **Fuel storage fire and explosion**

03 **Worker injuries during maintenance turnarounds**

FOSSIL FUEL POWER PLANT INSURANCE

Coverage worth discussing

Commercial property
Insured fuel-fired plant after covered physical damage.

Environmental liability
Covered pollution claims under accepted release terms.

Workers compensation
Work-injury benefits for eligible plant employees.

Equipment breakdown
Covered internal failures of accepted boilers or turbines.

General liability
Covered third-party harm from accepted generating operations.

Umbrella liability
Extra limits above expressly covered underlying liabilities.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 **Listen**
We review your operations, coverage and past claims.

02 **Assess**
We look at hazards and ways to reduce risk.

03 **Build**
We compare carriers, premiums and audit terms.

04 **Support**
We revisit coverage as your work changes.
