

FIELD MEASUREMENTS AND SUBSURFACE DATA

A mapping error can mislead a client.

You collect and interpret mapping or geophysical data for client decisions. Actual subsurface or boundary duties and field instruments need accepted terms, with UAV damage distinct from flight or privacy liability.

RISKS WORTH DISCUSSING

- 01 Alleged mapping or interpretation errors
- 02 Theft of field-survey instruments
- 03 Third-party injuries during site surveys

Coverage worth discussing

Professional liability

Covered claims over expressly accepted mapping services.

General liability

Covered nonprofessional injury from accepted survey activities.

Inland marine

Insured survey instruments under accepted equipment terms.

Commercial auto

Covered road liability for accepted survey vehicles.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
