

GEOTHERMAL POWER GENERATION

A well incident can interrupt generation.

You generate electricity using geothermal heat. Fluid chemistry and pressure affect equipment integrity, while turbine damage creates significant sales interruption.

RISKS WORTH DISCUSSING

- 01 Well blowout and casing failure
- 02 Corrosion and mineral scaling damage
- 03 Turbine and binary-cycle breakdown

Coverage worth discussing

Commercial property

Insured surface facilities after covered physical damage.

Environmental liability

Covered claims from accepted geothermal-fluid releases.

Workers compensation

Work-injury benefits for eligible geothermal employees.

Equipment breakdown

Covered internal failures of accepted generating machinery.

General liability

Covered third-party harm from accepted geothermal duties.

Inland marine

Declared mobile well gear after covered physical loss.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
