

PASSENGER AND UTILITY TRANSPORT

Rotor wash can injure people near landings.

You fly passengers or move external loads at confined sites. Flight, rotor-wash and load liability need aviation terms alongside ground-support policies.

RISKS WORTH DISCUSSING

- 01 Rotor wash ground injury
- 02 Dropped external-load damage
- 03 Confined landing zone exposure

Coverage worth discussing

General liability

Covered visitor injuries at declared ground bases.

Workers compensation

Employee injury benefits for accepted pilot or ground duties.

Umbrella liability

Extra limits above expressly included aviation liabilities.

Commercial property

Insured hangars and declared ground-maintenance gear.

Inland marine

Declared portable ground gear after covered physical damage.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
