

HOG HOUSING AND MANURE HANDLING

Ventilation failure can endanger confined hogs.

Your hog houses depend on ventilation and manure systems. Herd mortality, equipment repairs and runoff allegations need distinct accepted terms.

RISKS WORTH DISCUSSING

- 01 Ventilation and power system failure
- 02 Manure runoff and odor allegations
- 03 Worker gas exposure in confined spaces

Coverage worth discussing

Commercial property

Insured hog houses and declared fixed equipment.

Environmental liability

Covered manure-release claims from declared hog operations.

Equipment breakdown

Covered internal failures of climate-control machinery.

General liability

Covered visitor injuries at the declared hog facility.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
