

FABRICATION AND ASSEMBLY

A refrigerant leak reaches beyond the unit.

You fabricate and test HVAC systems, where unit performance, refrigerant handling, and assembly pose specific risks.

RISKS WORTH DISCUSSING

- 01 Product defect and performance failure
- 02 Refrigerant leak environmental exposure
- 03 Brazing and assembly fire hazards

Coverage worth discussing

Products liability

Covered injury or other-party damage from HVAC units.

Commercial property

Restores plant property after covered losses.

Equipment breakdown

Covered internal failures of production test equipment.

Environmental liability

Helps manage costs for refrigerant cleanup.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
