

ROOFTOP SERVICE, HOT WORK AND CONNECTIONS

A torch spark can ignite a roof.

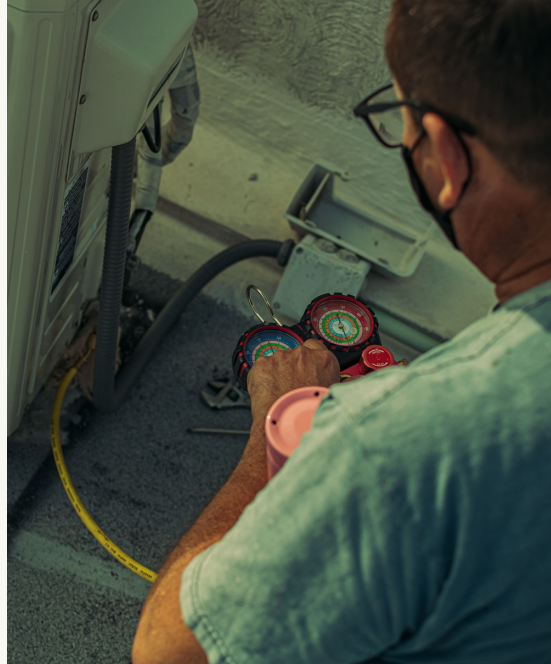

You maintain heating and cooling systems at customer sites. Actual hot work, roof access and completed repairs need accepted terms, with resulting damage distinguished from correcting your own work.

RISKS WORTH DISCUSSING

- 01 Resulting harm from faulty connections
- 02 Torch-related fires at client sites
- 03 Technician falls during rooftop work

Coverage worth discussing

General liability

Covered resulting harm from accepted maintenance operations.

Workers compensation

Work-injury benefits for eligible HVAC employees.

Commercial auto

Covered road liability for accepted service vehicles.

Inland marine

Insured gauges and tools at accepted service stages.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
