

WAREHOUSE CONSTRUCTION

Long roof spans face wind during the build.

Coordinate steel erection and staged-material protection with unfinished-structure coverage and heavy-lift liability.

RISKS WORTH DISCUSSING

- 01 Crane and tilt-up panel collapse
- 02 Wind uplift on long-span roofs
- 03 Theft of steel and copper

Coverage worth discussing

General liability

Responds to third-party injury during site work.

Workers compensation

Benefits for crews during heavy steel erection.

Environmental liability

Addresses pollution claims from site operations.

Builders risk

Covers unfinished structures against wind and fire.

Inland marine

Protects cranes and excavators from theft.

Umbrella liability

Adds liability limits for erection operations.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
